

Chapter 2

Key Concepts of International Arbitration

Prof Yarik Kryvoi

British Institute of International and Comparative Law

This chapter introduces and defines key concepts of arbitration such as consent, arbitration agreement, jurisdiction, *ad hoc* and institutional arbitration, seat of arbitration, expedited arbitration, interim measures, arbitrators, applicable law, arbitral awards, enforcement and other related topics. Arbitration is a private dispute resolution method where parties submit disagreements to a tribunal rather than courts for a binding decision. Modern arbitration encompasses diverse sectors like investor-state, sports, maritime, and business and human rights disputes. Special conventions related to the enforcement of arbitration awards make arbitration particularly suitable for international disputes as the prospects of enforcing arbitration awards are often better than those of domestic court judgements. The chapter concludes by addressing some emerging trends in international arbitration emphasizing diversity, digitization, environmental considerations, and third-party funding. Future reforms focus on enhancing efficiency, inclusion, and legitimacy to adapt to evolving global needs and challenges.

Keywords: arbitral tribunals, applicable law, arbitral awards, arbitration procedure, jurisdiction, ADR

1. Background and History

Arbitration is a dispute resolution process in which parties agree to submit a disagreement to a non-governmental decision-maker (typically called arbitration tribunal), rather than a domestic or international court, to render a binding decision. International arbitration has evolved over centuries into a widely used mechanism for resolving conflicts. It has become a crucial tool in addressing disputes not only between private parties but also among sovereign States and state-created entities such as international organisations. The 20th century has witnessed the emergence of specialized arbitration mechanisms for many types of disputes, for example, investor-state, sports, maritime, commodities and business and human rights disputes. Despite

DRAFT CHAPTER

shared features, these arbitration mechanisms differ. Key concepts of international arbitration,¹ which are introduced in this chapter, pave the way for more in-depth discussions in following chapters.

Arbitration has a long history.² When in the Medieval and Renaissance periods, traders engaged in cross-border transactions facing unfamiliar legal systems abroad, they turned to local trade associations for informal dispute resolution, bypassing state courts.³ For example, between the 13th and 17th centuries, the Hanseatic League, a confederation of merchant guilds in Northern Europe, played a key role in trade facilitation. The league established an arbitration system to resolve disputes among its members.⁴

Subsequently, bilateral and multilateral treaties began to include arbitration clauses. Notable examples include the Jay Treaty between the United States and Great Britain in 1794, which established a commission for resolving claims.⁵ States used mixed claims commissions, particularly in the early to mid-20th century, to arbitrate disputes arising after armed conflicts. These commissions allowed private individuals to directly pursue claims against states, expanding the scope of arbitration beyond interstate disputes.⁶ In many instances, these commissions permitted private individuals to pursue direct claims against states.⁷

The first significant institutionalization of international arbitration occurred with the creation of the Permanent Court of Arbitration (PCA) in 1899 in the Hague, Netherlands.⁸ Subsequently, the PCA has developed into a modern arbitral institution resolving disputes not only between states but also with involvement of private parties.⁹

The use of arbitration as a dispute resolution in the field of international commercial transactions has grown significantly following the adoption of the New York Convention¹⁰ in 1958, now ratified by over 170 States. This treaty facilitates the enforcement of arbitral awards

¹ According to the comparative grid presented in Chapter 1 of this book, these are arbitration agreement and consent, jurisdiction, key procedural elements, adjudicators, applicable law, awards and enforcement and relationship between arbitration tribunals and domestic/international courts.

DRAFT CHAPTER

in different countries, contributing to the widespread acceptance of arbitration as a preferred method of dispute resolution.

Figure 1. Map of States, which have ratified the 1958 New York Convention (States in red are not parties to the convention)

The United Nations Commission on International Trade Law (UNCITRAL) developed the Model Law on International Commercial Arbitration in 1985,¹¹ which provides a framework for domestic legislation on arbitration, which over 123 jurisdictions and 90 states have adopted.¹²

The establishment of specialised arbitral institutions including the International Centre for Settlement of Investment Disputes (ICSID)¹³ in 1966, and the Court of Arbitration for Sport (CAS)¹⁴ in 1984 offered new possibilities for resolving international disputes through arbitration. The users of arbitration include not only businesses but also states, individuals, international organisations and other organisations.

Various treaties incorporate arbitration provisions as mechanisms for dispute resolution, affording parties a flexible and unbiased avenue for resolving conflicts outside judicial fora. Illustrative instances encompass the UNCLOS¹⁵ the Regional Comprehensive Economic Partnership Agreement uniting 15 Asia-Pacific nations,¹⁶ or bilateral investment treaties

DRAFT CHAPTER

(BITs).¹⁷ Furthermore, hundreds of instruments referring to the PCA have been concluded between states, international organizations, and private parties.¹⁸ They cover diverse subject matters including international development cooperation, environmental protection, investment protection, and functioning of international organizations. In the context of investor-state arbitration, the ICSID Convention focuses on resolving investor-state disputes. An impressive array of 158 Contracting States have ratified it.¹⁹

Businesses around the world use private arbitral institutions in various countries such as the International Arbitration Court of the International Chamber of Commerce (ICC),²⁰ the London Court of International Arbitration (LCIA),²¹ and the Singapore International Arbitration Centre (SIAC).²² As the number of disputes resolved by arbitration grows, so does the number and geography of international arbitral institutions.

2. Vital Statistics and Caseload Trends

Every year, arbitration helps to resolve tens of thousands of disputes.²³ While the number of inter-state cases is low compared to commercial arbitration,²⁴ inter-state often relate to disputes carrying considerable diplomatic and political weight. For example, the South China Sea Arbitration involved the Philippines and China, addressing issues like historic rights, maritime entitlement origins, and the status of specific maritime features.²⁵ This dispute holds substantial geopolitical significance due to the region's strategic importance.

Statistical insights from leading arbitral institutions shed light on the number of disputes in various economic sectors. We can categorize the predominant caseload into the following key sectors.

¹⁷ E.g. Netherlands–Bahrain BIT (2007), Art. 9; China–Nigeria BIT (2001), Art. 9.

DRAFT CHAPTER

Commodities: Commodity disputes encompass conflicts arising from international commodity transactions, such as grain, oil, sugar or metals.²⁶ These conflicts involve a broad spectrum of issues, including breach of contract, non-performance, non-payment, and other legal matters that may emerge throughout a commodity transaction. Many commodity-related disputes are resolved by specialised arbitral institutions such as the Grain and Feed Trade Association (GAFTA) and the Federation of Oils, Seeds and Fats Associations (FOSFA). Various of these institutions offer specialized commodities arbitration rules to efficiently address the unique challenges and intricacies of such disputes.²⁷

Maritime and shipping: Arbitral rules, such as SIAC²⁸ and LMAA (London Maritime Arbitrators Association),²⁹ are applied to handle a notable proportion of maritime disputes, underscoring the significance of the shipping sector in international arbitration. Examples of disputes in this sector involve collisions or damage to vessels, disputes arising from charter parties or bills of lading, and conflicts over maritime insurance coverage.³⁰

Construction: The construction sector features prominently across various arbitral institutions, including ICSID,³¹ CIETAC (China International Economic and Trade Arbitration Commission),³² and SIAC.³³ Disputes in this sector include claims for delays or disruptions to construction schedules, disputes over payment terms or contract specifications, defects in workmanship or materials.³⁴

Transport: The transport sector has increasingly become a focal point in international arbitration, particularly in the context of disputes related to trade in commodities and agricultural products.³⁵ Disputes often concerned the quality or quantity of delivered goods or delays or damages during commodity transportation.

²⁶ See Chapter XX of this book (Litina).

²⁷ See Chapter XX of this book (Litina).

²⁸ Maritime disputes constituted 13% of cases at SIAC in 2022, highlighting the presence of shipping-related matters in arbitration proceedings: SIAC (n **Error! Bookmark not defined.**).

²⁹ Disputes administered by the LMAA further highlighting the breadth of industries addressed through arbitration mechanisms: LMAA (n **Error! Bookmark not defined.**).

³⁰ See Chapter XX of this book (Clanchy).

³¹ At ICSID 12% of cases in 2022 related to construction, <https://icsid.worldbank.org/sites/default/files/publications/ICSID-AR2024-WEB.pdf>.

³² CIETAC manages disputes in construction projects, suggesting a considerable presence of construction-related arbitration cases: CIETAC (n **Error! Bookmark not defined.**).

³³ SIAC observed that disputes related to construction contributing to 11% of cases in 2022, indicating the significance of this sector in arbitration proceedings: SIAC (n **Error! Bookmark not defined.**).

³⁴ See Chapter XX of this book (Nazzini).

³⁵ For instance, the LCIA reported a notable increase in transport and commodities cases, constituting 37% of the caseload in 2022 compared to 14% in 2021, indicating a growing trend in arbitration related to transportation: LCIA (n **Error! Bookmark not defined.**).

DRAFT CHAPTER

Energy and resources: Institutions like the LCIA³⁶ and ICSID³⁷ resolve a significant number of disputes relating to this economic sector. Disputes often deal with disagreements over the interpretation of production sharing agreements, resource allocation, and conflicts stemming from environmental regulations affecting energy projects.

Banking and finance: Institutions such as the LCIA³⁸ and CIETAC³⁹ observe a significant portion of their caseload originating from disputes in the banking and finance sector. This includes conflicts arising from loan agreements, interbank disagreements, and derivatives.⁴⁰

Besides these sectors, international arbitration has seen disputes emerge across a spectrum of other industries (e.g., digital business, healthcare and pharmaceuticals, and professional services) in recent decades confirming the demand for arbitration as an effective dispute resolution mechanism.

3. Arbitration Agreement and Consent

Consent serves as the basis of any arbitration, reflecting the autonomy of arbitration users. An arbitral tribunal may only settle issues that the parties have agreed to resolve through arbitration.⁴¹ This arbitration agreement can take various forms, including arbitration clauses in a contract,⁴² compromise (a separate agreement),⁴³ or expression of consent in domestic laws and treaties,⁴⁴ which is subsequently accepted by the other party which has a right to rely on the treaty (e.g., the investor). Regardless of how its form or whether reached before or after a disagreement emerges, parties need to express consent and form a binding agreement to

³⁶ The LCIA observed a decrease in the proportion of energy and resources cases from 25% in 2021 to 11% in 2022, indicating a potential shift in the arbitration landscape within this sector: LCIA (n **Error! Bookmark not defined.**).

³⁷ ICSID proceedings in FY2022 continued to be dominated by extractives and energy sectors, comprising a significant portion of new cases: ICSID (n **Error! Bookmark not defined.**).

³⁸ The LCIA reported a notable shift in its caseload, with banking and finance cases decreasing from 26% in 2021 to 15% in 2022, reflecting fluctuations in this sector's arbitration activity: LCIA (n **Error! Bookmark not defined.**).

³⁹ CIETAC effectively manages disputes in equity investment and financial securities, indicating a notable presence of financial matters in arbitration. CIETAC (n **Error! Bookmark not defined.**).

⁴⁰ There is also a specialised P.R.I.M.E. Finance arbitration institution and rules established to resolve financial disputes. See P.R.I.M.E. Finance, <https://primefinancedisputes.org>.

⁴¹ See, e.g., UNCITRAL Model Law 1985 (n 11), Art. 16; LCIA Arbitration Rules 2020 (LCIA Rules), Art. 23(1); UNCITRAL Arbitration Rules 2021 (UNCITRAL Rules), Art. 23.

⁴² An arbitration clause is a provision in a contract that stipulates that parties will resolve any dispute arising from the contract through arbitration rather than through litigation in court. Standard contract clauses are pre-written terms and conditions that parties include in a contract. See, *Adriano Gardella v. Ivory Coast*, 1 ICSID Reports 287; *AGIP v. Congo*, 1 ICSID Reports 313; *Amco v. Indonesia*, 1 ICSID Reports 392.

⁴³ A compromise (or *compromis*) in the context of arbitration refers to a binding agreement of the parties, which is formalized in writing. A typical example of where the parties may agree on a *compromis* is when a dispute has already arisen between the parties, but they do not wish to go to a domestic court.

⁴⁴ In arbitration, an expression of consent signifies that the parties agree to submit their disputes to arbitration rather than litigating in court. This consent can take various forms, such as a separate written arbitration agreement or clause within a contract, a documented record of mutual consent, or an agreement to arbitrate after a dispute arises. In the context of investor-state arbitration, consent can also be expressed in domestic law. See, e.g., Albanian Law on Foreign Investment 1993, Art. 8(2); Greater Colombo Economic Commission Law 1978, Sec. 26(1).

DRAFT CHAPTER

arbitrate their dispute. The validity of these different types of agreements to arbitrate depends on meeting both formal requirements, as dictated by applicable laws or agreed standards.

It must be noted that an arbitration clause within a contract is considered a separate agreement, independent of the other contractual terms. If the arbitral tribunal determines that the contract is null and void, it does not automatically render the arbitration clause invalid.⁴⁵ In some jurisdictions, it is known as the doctrine of separability.⁴⁶

Previously, international conventions such as the 1958 New York Convention and the UNCITRAL Model Law mandated that arbitration agreements were only 'in writing'.⁴⁷ A significant transformation in communication has occurred in recent years. Telegrams, once commonplace, are now considered outdated artifacts, replaced by diverse forms of written electronic communication. In light of this, one of the options for States to include in their domestic laws provided in the UNCITRAL Model Law's in 2006 explicitly broadened the definition of 'writing' to encompass various forms, including electronic communication.⁴⁸ Despite the relaxation of formality, a minimum requirement for a permanent record remains. The majority of jurisdictions mandate written agreements. For instance, the Netherlands Arbitration Act 1986 mandates proof of the arbitration agreement through a written instrument expressly or impliedly accepted by the parties.⁴⁹ Similarly, Swiss law stipulates that the arbitration agreement must be in writing or through a communicative means allowing textual evidence.⁵⁰

4. Jurisdiction

An arbitral tribunal may only settle issues that the parties have agreed to resolve through arbitration. The parties give a tribunal the authority to resolve disputes between them, and the arbitral tribunal must take care to abide within the boundaries of that authority, also known as jurisdiction.

Domestic legislation and international treaties highlight the importance of an arbitral tribunal not exceeding its jurisdiction. For example, the UNCITRAL Model Law provides that an arbitral award can be set aside in domestic courts if it deals with a dispute not contemplated by or not falling within the terms of the arbitration agreement.⁵¹ Domestic laws of most jurisdictions follow this approach.⁵² The New York Convention provides that recognition and

⁴⁵ Ibid.

⁴⁷ New York Convention 1958 (n 10), Art. 2(2).

⁴⁸ UNCITRAL Model Law 1985 (n 11), Art. 7(2).

⁴⁹ Netherlands Arbitration Act 1986, Sec. 1021.

⁵⁰ Swiss Private International Law 1987 (SPIL), Art. 178(1).

⁵¹ UNCITRAL Model Law 1985 (n 11), Art. 34(2).

⁵² In France, for example, an award may be contested if the arbitral tribunal either erroneously affirmed or rejected jurisdiction: French Code of Civil Procedure (French CCP), Art. 1520.1.

DRAFT CHAPTER

enforcement of an award may be refused by domestic courts if the award addresses issues outside the scope of the arbitration agreement.⁵³

The notion of arbitrability established the limits of jurisdiction of arbitral tribunals. It concerns whether a dispute can be resolved through arbitration. The New York Convention and the Model Law apply to disputes 'capable of settlement by arbitration'.⁵⁴ States can limit the types of disputes suitable for arbitration reflecting their policy preferences.⁵⁵ Certain matters reserved for domestic courts are outside the scope of arbitration due to their public nature. In other words, domestic courts should adjudicate such disputes.

Despite the growing trend towards permitting arbitration of traditionally non-arbitrable matters, the specific categories of disputes eligible for arbitration vary significantly across jurisdictions. For instance, disputes related to specific subjects like family law, criminal matters, consumer law, patents, competition law, and insolvency are generally not considered arbitrable.⁵⁶

The question of arbitrability can arise during arbitration proceedings or after the tribunal renders an award. Arbitral tribunals have authority to decide on arbitrability based on the law governing the arbitration agreement⁵⁷ or the laws of the seat of arbitration (*lex arbitri*).⁵⁸ According to the New York Convention, the law of the country where recognition or enforcement is sought determines arbitrability.⁵⁹

Types of Jurisdiction

The jurisdiction of arbitral tribunals typically covers the following aspects: subject matter jurisdiction, personal jurisdiction and temporal jurisdiction.

Subject matter jurisdiction refers to the authority of the arbitral tribunal to hear and decide a particular type of dispute determined by the arbitration agreement between the parties (e.g., 'all disputes arising' out of a particular contract or a treaty). For example, Arbitral Tribunals constituted under Annex VII of the United Nations Convention on the Law of the Sea

⁵⁴ UNCITRAL Model Law 1985 (n 11), Art. 34(2)(b)(i) and 36(1)(b)(i); New York Convention 1958 (n 10), Art. 2(1) and Art. 5(2)(a).

⁵⁵ *Egerton v. Brownlow* [1853] 4 HLC 1 (the Supreme Court of England and Wales once characterized public policy as the legal principle stating that no individual can lawfully engage in actions that may be harmful to the public or contrary to the common good); *Parsons & Whittemore Overseas v. Société Générale de L'Industrie du Papier* (RAKTA), 508 F.2d 969, 974 (1974) (U.S.) (US courts have defined public policy as encompassing the fundamental concepts of morality and justice within the jurisdiction where the legal proceedings are held.)

⁵⁶ E.g., French law delineates certain topics that are not open to arbitration within the jurisdiction of France, such as disputes concerning personal status (capacity, marriage, and divorce) or involving public entities or administrations (with limited exceptions for commercial activities authorized by decree): French CCP (n **Error! Bookmark not defined.**), Art. 2060. Indian courts have identified non-arbitrable disputes, including criminal offenses, matrimonial, guardianship, insolvency, testamentary, intellectual property, and tenancy matters: Indian AA (n **Error! Bookmark not defined.**), Sec. 2(2).

⁵⁷ ICC case no 6719, *Arnaldez Derains Hascher*, ICC Awards 1991-1995; ICC case no 6149 *Arnaldez Derains Hascher*, ICC Awards 1991-1995.

⁵⁹ New York Convention 1958 (n 10), Art. V(2)(a).

DRAFT CHAPTER

(UNCLOS) have only jurisdiction over disputes concerning the interpretation or application of the UNCLOS, rather than any law of the sea-related or even public international law dispute.⁶⁰

The tribunal's *personal jurisdiction* defines whom jurisdiction extends to, typically these are parties named in the arbitration agreement. In some cases, parties must meet particular characteristics. For example, in investor-state arbitration the personal jurisdiction extends to any investment-related dispute between a state party that has agreed to submit investment disputes to arbitration under the terms of the treaty and a national of another State party to that treaty.⁶¹ Generally, the tribunal has authority to render binding awards only in relation to those who have agreed to arbitrate.

Temporal jurisdiction concerns the relevant time frame in relation to which the arbitral tribunal has authority to adjudicate a dispute. The agreement between the parties may specify the relevant time periods or events. For example, in commercial arbitration arbitral tribunals typically have jurisdiction over disputes that arise during the contractual relationship or within a specified period after the termination of the contract. Tribunals might hesitate to address disputes arising before or after the contractual relationship unless expressly outlined in the treaty.⁶²

Challenges to Jurisdiction

Challenges to jurisdiction can arise when one party contests the authority of the arbitral tribunal to hear a particular dispute. Challenges to jurisdiction may be partial or total. A partial challenge typically arises from the interpretation of arbitration agreements and may hinge on whether the matter referred to arbitration aligns with the scope of the arbitration agreement. Conversely, a total challenge to jurisdiction poses a more fundamental inquiry into the existence of a valid arbitration agreement. Grounds for a total challenge often involve core elements of arbitration clauses, such as disputes regarding consent, the form of the arbitration agreement, arbitrability under the applicable law, time-barred claims, or unmet preconditions to arbitration.⁶³

For example, a construction contract might stipulate that any disputes regarding extra work must first be reviewed and determined by an engineer before proceeding to arbitration. If a party brings claims without seeking the engineer's decision, the opposing party may contend that this failure results in arbitration claims are inadmissible or outside of the jurisdiction of the arbitral tribunal.⁶⁴ While admissibility deals with the suitability of a claim for arbitration at a specific time, such as being time-barred or requiring certain preconditions to be fulfilled, jurisdiction

⁶⁰ United Nations Convention on the Law of the Sea, 10 December 1982, 1833 U.N.T.S. 397 (UNCLOS).

⁶¹ ICSID Convention (n **Error! Bookmark not defined.**), Art. 25.

⁶² See, e.g., *Jan de Nul NV and Dredging International NV v Arab Republic of Egypt*, ICSID Case No ARB/04/13, Award (6 November 2008), paras 125 and 129; *Ping An Life Insurance Company of China, Limited and Ping An Insurance (Group) Company of China, Limited v Kingdom of Belgium*, ICSID Case No ARB/12/29, Award (30 April 2015), para 193, 200.

⁶³ These statutes highlight grounds for total challenge such as invalidity due to incapacity or lack of consent, lack of jurisdiction by the tribunal over the dispute or parties, procedural errors like improper notice, and substantive grounds i.e., UNCITRAL Model Law 1985 (n 11), Art. 34(2)(a); Swedish Arbitration Act 2019 (Swedish AA), Sec. 34; English Arbitration Act 1996 (English AA), Sec. 30(1); Indian Arbitration Act 1996 (Indian AA), Sec. 34(2).

⁶⁴ Similarly, a challenge can also be based on admissibility e.g., *Burlington Resources, Inc. v Ecuador*, ICSID Case No. ARB 08/5, Jurisdictional Decision, 2 June 2010.

DRAFT CHAPTER

focuses on the tribunal's authority to make decisions on matters within the agreed scope of the arbitration clause.⁶⁵

Arbitral rules and domestic arbitration laws often provide procedures for resolving challenges to jurisdiction. Except in inter-state arbitration, domestic courts play an important role in settling jurisdictional matters, typically allowing intervention only after the arbitral tribunal has made its jurisdictional decision.⁶⁶ This highlights the importance of domestic laws applicable at the seat of arbitration when drafting arbitration agreements.⁶⁷ For example, in jurisdictions like England, domestic courts also have the power to address questions to determine the substantive jurisdiction of the tribunal at the preliminary stage.⁶⁸ Apart from challenging the arbitral award directly in the jurisdiction where the arbitration took place, a party retains the option to subsequently contest the award during the enforcement phase.

5. Key Procedural Elements

Ad hoc and Institutional Arbitration

Arbitration, as a dispute resolution mechanism, provides parties with the autonomy and flexibility to tailor the proceedings to their needs. The choice between *ad hoc* or institutional arbitration significantly shapes the procedural elements of arbitration.⁶⁹ In *ad hoc* arbitration, parties directly manage the arbitration process without (or limited) involvement of an administering institution. They may draft their own rules and procedures or choose to follow established rules such as the UNCITRAL Arbitration Rules.⁷⁰ As discussed in more detail elsewhere in this book in its 'purest' form, an *ad hoc* arbitration would entail a tribunal and the parties agreeing procedural rules for all aspects of the arbitration not provided for by the applicable law of the seat.⁷¹ Some institutions additionally provide model rules that parties can use for *ad hoc* arbitration not linked to any particular arbitral institution.⁷²

In institutional arbitration, a recognized institution (e.g., ICC, SIAC or PCA) administers the procedure. It provides administrative support, rules, or appoints arbitrators. This can add a level

⁶⁵ See, generally, Jan Paulsson, 'Jurisdiction and Admissibility' (2010) *Global Reflections on International Law, Commerce and Dispute Resolution* 601.

⁶⁶ Examples of provisions on intervention by national courts include Swedish AA (n **Error! Bookmark not defined.**), Sec. 2(2); French CCP (n **Error! Bookmark not defined.**), Art. 1448.1; International Arbitration Act 1994 (Singapore AA), Sec. 10(3).

⁶⁷ It must be noted, in inter-state arbitration domestic courts usually do not have any involvement in jurisdictional challenges and tribunals have a final say on jurisdictional issues. See, e.g., Permanent Court of Arbitration Optional Rules for Arbitrating Disputes between two states (PCA Optional Rules), Art. 21.

⁶⁸ English AA (n **Error! Bookmark not defined.**), Sec. 32(1).

⁶⁹ See Chapter XX of this book (Fullelove/B).

⁷⁰ UNCITRAL Arbitration Rules should be distinguished from UNCITRAL Model Law on Arbitration, discussed earlier. The model law is not a binding document, but a set of norms, which states may implement and modify, if needed, in their domestic law. On the other hand, parties can decide to directly apply UNCITRAL Arbitration Rules to resolve their dispute through arbitration.

⁷¹ See Chapter XX of the book devoted to *ad hoc* arbitration.

⁷² UNCITRAL Rules (n **Error! Bookmark not defined.**); Institute for Dispute Resolution Rules for Non-Administered Arbitration of International Disputes and Commentary 2018; LMAA Terms and Procedures (LMAA Rules) 2021.

DRAFT CHAPTER

of structure and efficiency to the institutional arbitration process. It must be noted, however, that many arbitration mechanisms are not purely *ad hoc* or institutional, but rather sit somewhere on the spectrum between these two poles.⁷³

The decision of choosing between institutional and *ad hoc* arbitration depends on factors such as the nature of the dispute and preferences of the parties. Institutional arbitration provides several benefits such as detailed arbitration rules, administrative support from a secretariat, or assistance in selecting qualified arbitrators. However, institutional arbitration entails potential drawbacks such as high administrative costs and short timelines.

Ad hoc arbitration often proves more cost-effective since it does not require paying fees to arbitration institutions. It suits various claim sizes and offers flexibility in choosing procedural rules tailored to parties' needs. However, *ad hoc* arbitration may also bring certain disadvantages, including potential disagreements on procedures, arbitrator selection, or arbitrator fees, and greater responsibilities for organizing the arbitration.⁷⁴ Moreover, *ad hoc* awards may be difficult to enforce in some jurisdictions.⁷⁵

Initiation and Conduct of Proceedings

The arbitration process typically begins with the initiation of proceedings. Typically, one party sends a notice of arbitration to the other or to the institution.⁷⁶ This document typically outlines the claims, identifies the arbitrators or the method for their appointment, and sets the stage for the arbitration.

Additionally, parties in international arbitration may agree (whether through the adoption of particular rules or otherwise) to sign terms of reference which represent a contractual instrument endorsed by both parties and arbitrators. The purpose is to establish precise parameters of the dispute (in particular the issues in dispute, identifying claims and counterclaims) and its procedural elements (such as governing law, language, timeline).⁷⁷

The proceedings typically involve various stages, including the exchange of statement of claim and defence,⁷⁸ the presentation of evidence,⁷⁹ witness examinations,⁸⁰ and legal arguments.⁸¹ The tribunal manages the process, ensuring fairness and efficiency.

⁷³ See Chapter XX (4) of this book (...).

⁷⁴ See, e.g., Yarik Kryvoi, 'UK and International Experience in the Admission, Regulation and Operation of Arbitral Institutions' (Great Britain China Centre, 2021) <<https://ssrn.com/abstract=3827454>> accessed 2 December 2024.

DRAFT CHAPTER

Seat and Place of Arbitration

Parties often agree on the seat of the arbitration, which determines the legal framework for the arbitration, including the applicable procedural law (*lex arbitri*)⁸² and the authority of local courts to intervene and support arbitration.⁸³ The physical place of arbitration, i.e., the actual location where arbitration hearings and proceedings occur does not always coincide with the seat of arbitration. After the Covid-19 pandemic many arbitration proceedings increasingly take place fully or partially in a remote (online) format,⁸⁴ which should have no impact on the seat of arbitration. It is the latter, which determines the applicable procedural framework (*lex arbitri*) and the courts with supervisory jurisdiction.⁸⁵

The *lex arbitri* also determines the legal requirements for setting aside (also known as 'annulling' or 'vacating') an award and enforcement in that particular jurisdiction.⁸⁶ Therefore, it is crucial to carefully consider various factors when selecting the seat. One survey of practitioners suggests that the five most preferred seats for arbitration of international disputes are London, Singapore, Hong Kong, Paris and Geneva.⁸⁷

Parties often choose these cities as arbitration seats because of arbitration-friendly laws and practices and the presence of leading arbitral institutions. For instance, LCIA is headquartered in London, making it a popular choice for arbitration proceedings administered under these rules. Similarly, Singapore hosts SIAC, while Hong Kong is home to HKIAC (Hong Kong International Arbitration Centre), contributing to prominence of these cities as arbitration seats. Miami has recently emerged as a seat of arbitration, particularly for Latin American disputes.

However, the city of the headquarters does not always define the seat of arbitration. For example, in one year, according to LCIA statistics, beyond London, twelve other cities were selected as seats of LCIA arbitrations.⁸⁸

In inter-state arbitrations, the geography of disputes is different. For example, the PCA is based in the Hague, which attracts many disputes to this city.⁸⁹ However, the parties can decide to

⁸² Domestic legislations clarifying the link between the seat of arbitration and *lex arbitri* see, e.g., SPIL (n 50), Art. 176(1); Indian AA (n **Error! Bookmark not defined.**), Sec. 2(2); Malaysian Arbitration Act 2005, Sec. 3(3); German Code of Civil Procedure 2005 (German CCP), Sec. 1, § 1025(1).

⁸³ See, e.g., *International Standard Electric Corporation (US) v Bridas Sociedad Anonima Petrolera (Argentina)* (1992) VII YBCA 639; *Bharat Aluminium Co. v Kaiser Aluminum Technical Service, Inc.*, Civil Appeal No. 7019 of 2005 (courts in various countries have consistently ruled that the authority to oversee arbitration proceedings is exclusively vested in the jurisdiction where the arbitration is seated).

⁸⁴ For instance, in 2023 Sixty-six percent of all hearings and sessions combined remote and in-person features. ICSID, 'Annual Report 2023' (ICSID, 2024) <https://icsid.worldbank.org/sites/default/files/publications/ICSID_AR2023_ENGLISH_web_spread.pdf> accessed 13 January 2024.

⁸⁹ In 2023, approximately one third of disputes take place in the Hague, the rest take place in other countries. See, Permanent Court of Arbitration, Annual Report 2023, <https://docs.pca-cpa.org/2024/06/0bd839f2-pca-annual-report-2023.pdf>, P. 28.

DRAFT CHAPTER

have a seat of their arbitration in other cities. PCA has offices in Buenos Aires, Ha Noi, Mauritius and Singapore.⁹⁰

Language of Arbitration

Parties can also choose the language of arbitration. English remains the dominant language of international business. For example, for ICC arbitrations around 80% of proceedings and awards are in English, the same is true for many other institutions around the world.⁹¹ In some areas, however, other languages also play a prominent role. For example, in ICSID proceedings sixty four percent of the cases were conducted in English and seven percent of all cases were conducted either only in Spanish or in Spanish and English simultaneously.⁹²

Other languages often used in international arbitration include French (in Europe and Francophone Africa), Portuguese (in Europe and Brazil) and Russian (in some former Soviet Union states).⁹³ The world's business arbitral institutions are based in China and Chinese language plays an important role there because most disputes administered by such institutions are of domestic nature, without an international element.⁹⁴

Procedural Powers of Tribunal

The powers of arbitral tribunals are linked to the so-called *Kompetenz-Kompetenz* principle. According to this principle, the tribunal has authority to rule on its own jurisdiction, including any challenges to jurisdiction.⁹⁵ Most institutional arbitration rules, contemporary arbitration statutes, and the principal international arbitration treaties recognise this principle.⁹⁶ The UNCITRAL Model Law provides that the arbitral tribunal has the authority to decide on its own jurisdiction, addressing objections related to the existence or validity of the arbitration agreement.⁹⁷

In many domestic legal systems, arbitral tribunals have the power to rule on their own jurisdiction before the domestic courts intervene. This principle underscores the arbitrators' ability to determine the extent of the authority of the tribunal. Domestic courts have to refrain from hearing arguments against the tribunals' jurisdiction until the tribunal itself had had a

⁹⁷ UNCITRAL Model Law 1985 (n 11), Art. 16(1).

DRAFT CHAPTER

chance to do so.⁹⁸ However, while arbitral tribunals autonomously decide on their own competence, domestic law usually imposes certain limitations.⁹⁹ Arbitral tribunals have the authority to hear evidence, to decide on various procedural matters, and render final awards.¹⁰⁰

Cost of proceedings

The costs of arbitration include arbitrator fees, administrative fees (for institutional arbitrations), legal fees (e.g., counsel fees), and other expenses (e.g., relating to the hearing venue, translators, transcription services and electronic 'hearing platform' costs).¹⁰¹ Arbitrators often address the allocation of costs in the final award, although separate costs awards are also common. When it comes to arbitrators' remuneration the parties may agree on a fee structure or refer to institutional rules that provide guidance on arbitrators' compensation.¹⁰²

Interim Measures

In arbitration, both the arbitral tribunal and domestic courts may issue interim measures (also known as provisional measures) to protect the parties' rights by preventing actions that may lead to immediate or impending harm or undermine the integrity of arbitral proceedings. Tribunals adopt such measures before the final award. Some examples of interim measures include appointment of an emergency arbitrator, stay of parallel proceedings, security of costs, and immediate protection of rights.¹⁰³

Interim measures are granted according to criteria outlined in the relevant applicable rules. One study concluded that in investor-state arbitration the criteria of urgency, necessity to avoid risk of harm or prejudice, existence of the right, proportionality, *prima facie* jurisdiction and a *prima facie* case on merits are the most widely used.¹⁰⁴

⁹⁸ For example, French law grants arbitral tribunals priority to decide on its jurisdiction: French CCP (n **Error! Bookmark not defined.**), Art. 1466; similar approach in English AA (n **Error! Bookmark not defined.**), Sec. 30(1); Swedish AA (n **Error! Bookmark not defined.**), Sec. 2.

⁹⁹ See, e.g., *Superior Court of Justice, Recurso Especial No. 1,602,076/SP*, 15 September 2016 (Brazil's highest court ruled that a domestic court has the authority to declare the nullity of an arbitration agreement if it is clearly and manifestly illegal, even before the conclusion of the arbitration proceedings.) Also, a Swiss court before which an action is brought shall decline jurisdiction unless it finds that the arbitration agreement is invalid, inoperable, or incapable of being performed.

¹⁰⁰ Examples of provisions on the authority to decide procedural matters, hear evidence, and render final awards include UNCITRAL Model Law 1985 (n 11), Art. 16; SPIL (n 50), Art. 186(1); SRIA Rules (n 96), Art. 23(1); ICC Rules (n 77), Art. 6(3); LCIA Rules (n **Error! Bookmark not defined.**), Art. 23(1); ICDR Rules (n 96), Art. 19(1).

¹⁰¹ For example, in investor-state arbitration, legal costs may reach millions of US dollars; see M. Hodgson, Y. Kryvoi and D. Hrcka, *Empirical Study: Costs, Damages and Duration in Investor-State Arbitration* (Allen & Overy and The British Institute of International and Comparative Law, 2021), https://www.biiicl.org/documents/136_isds-costs-damages-duration.pdf.

¹⁰⁴ See, e.g., David Goldberg, Yarik Kryvoi and Ivan Philippov, 'Provisional Measures in Investor-State Arbitration' (BIICL & White & Case, 2023) <www.biiicl.org/documents/157_provisional-measures-in-investorstate-arbitration-2023.pdf> accessed 2 December 2024.

DRAFT CHAPTER

Most arbitration rules explicitly confer authority upon the tribunal to order binding interim measures upon a party's request.¹⁰⁵ The ICSID Arbitration Rules differ in this respect by characterizing the tribunal's power as 'recommending' provisional measures.¹⁰⁶ In practice, however, such orders are usually seen as binding.¹⁰⁷

Emergency Arbitrators

Arbitration rules often provide for the appointment of emergency arbitrators to grant interim relief before the constitution of the full tribunal.¹⁰⁸ These procedures offer parties a mechanism to secure interim relief through a promptly appointed emergency arbitrator (typically within one or two business days) before the formal establishment of the arbitral tribunal.¹⁰⁹ Emergency arbitrators may allow parties to obtain interim measures without relief from domestic courts – for instance, to seek urgent remedies to preserve the *status quo*, prevent the other party from hiding assets or on other issues. Unlike a court, however, the emergency arbitrator has no power to issue an order that binds a third party to the arbitration, should such relief be sought.

Expedited Proceedings

Certain arbitration rules also provide for expedited mechanisms, whether for the whole or part of the arbitral process.¹¹⁰ A leading example of 'full' expedited arbitration procedures are the Expedited Arbitration Rules of the ICC.¹¹¹

The swift formation of an arbitral tribunal involves a simplified process to speed up arbitration proceedings. Within this framework, submitting a written application to the institution, with copies provided to all parties involved in the arbitration, is a pivotal initial step in commencing the accelerated arbitration procedure. In some cases, the arbitral institution has the authority to reduce the prescribed time frames for the tribunal's establishment at its discretion.¹¹²

Transparency and Confidentiality

The level of transparency and confidentiality of arbitral proceedings and related documents determines the extent to which non-parties can access information about proceedings. In practice, the parties can usually tailor the extent of transparency suitable for their case. Balancing transparency and confidentiality allows parties to safeguard their interests in arbitral proceedings and may also have a significant impact on the legitimacy of arbitration. In context

¹⁰⁵ Examples of provisions on interim measures upon party's request include ICC Rules (n 77), 28(1); UNCITRAL Rules (n **Error! Bookmark not defined.**), Art. 26(2); LCIA Rules (n **Error! Bookmark not defined.**), Art. 25(1); PCA Optional Rules (n **Error! Bookmark not defined.**), Art. 26.

DRAFT CHAPTER

commercial arbitration, the private nature of the process allows to keep disputes confidential, but this can vary depending on the governing law and the parties' agreement.¹¹³ In arbitrations involving States (e.g., State-State or investor-State arbitration), the awards and proceedings are typically public, although it may also be possible to change it.¹¹⁴

Although confidentiality remains a common feature of commercial arbitration, increasingly, there is a trend toward greater transparency in international arbitration.¹¹⁵ Some institutional rules require the publication of redacted awards.¹¹⁶ The calls for more transparency in commercial arbitration arise from the arguments that despite being private disputes, the implications of commercial arbitration affect the non-disputing as well.¹¹⁷ The 2014 Mauritius Convention on Transparency in Treaty-based Investor-State Arbitration,¹¹⁸ serves as a notable illustration of efforts aimed at facilitating the implementation of UNCITRAL Rules on Transparency¹¹⁹ in investor-state arbitration. However, only nine States have ratified this convention at the time of writing,¹²⁰ which suggests that states are not that eager to make their investor-State arbitrations more transparent in accordance with this convention. Notably, in domains such as business and human rights disputes, where public interest strongly advocates for transparency, comprehensive transparency provisions are delineated, as evidenced by the far-reaching transparency rules articulated in the Hague Rules on Business and Human Rights.¹²¹

6. Arbitrators

Arbitrators are independent individuals appointed to settle a dispute in accordance with an arbitral procedure. They play the central role in arbitral proceedings by deciding procedural questions and resolving the dispute on the merits. Arbitrators are typically appointed based on the agreement of the parties, which specifies the number of arbitrators (a sole arbitrator, a panel of three or more arbitrators) and the method of their appointment.

Arbitrators can be appointed in various ways, most commonly by parties (each party appoints its arbitrator, and the appointed arbitrators select a neutral presiding arbitrator) or institutions

DRAFT CHAPTER

(institutional rules foresee mechanisms for the appointment of arbitrators, either by the institution itself or by a designated appointing authority).¹²²

The qualifications and background of arbitrators can vary, and parties may agree on specific qualifications of arbitrators in their arbitration agreement.¹²³ Many arbitrators have legal expertise, industry knowledge, or experience relevant to the dispute. Increasingly, arbitral institutions and policymakers promote diversity in arbitral tribunals. This includes gender diversity, geographical diversity, and diversity in professional backgrounds. Some institutional rules encourage parties to consider diversity when appointing arbitrators.¹²⁴

Arbitrators must be impartial and independent. They must disclose any potential conflicts of interest and comply with ethical guidelines set forth in institutional rules or applicable laws.¹²⁵ Failure to comply with ethical and legal obligations may result in challenges to arbitrators¹²⁶ or to the arbitral award itself.¹²⁷

Grounds for disqualification may include bias, lack of impartiality, or failure to disclose relevant information.¹²⁸ At the same time, arbitrators generally enjoy immunity from legal action for acts performed in the course of their duties as arbitrators. This immunity is essential to ensure arbitrators can make decisions without fear of personal liability.¹²⁹

Parties typically define the term of service for arbitrators in the arbitration agreement or rely on default procedures in institutional rules. According to the principle '*functus officio*' (a Latin term that means 'having performed his or her office') once an arbitrator or arbitral tribunal has rendered a final award, their mandate and authority over the subject matter of the dispute comes

¹²² See, e.g., ICC Rules (n 77), Art. 13; LCIA Rules (n **Error! Bookmark not defined.**), Art. 5; UNCITRAL Rules (n **Error! Bookmark not defined.**), Art. 8, 9, 10.

DRAFT CHAPTER

to an end.¹³⁰ Challenges aim at the replacement or disqualification of arbitrators, as provided in relevant institutional rules or arbitration laws.¹³¹

7. Applicable law

The term applicable law refers to norms relevant to various aspects of arbitration. In contrast to domestic arbitration, international arbitration typically encompasses multiple legal systems or sets of legal principles. The identification of the applicable law stands as a crucial element within the arbitration proceedings.

The parties to an arbitration agreement often have the freedom to choose the applicable law governing the substance of their dispute.¹³² This choice is typically expressed in the arbitration agreement or through subsequent agreement during the arbitration process. If the parties do not specify the applicable law, or if there is ambiguity in the choice of law, the arbitral tribunal may determine the applicable law.¹³³ Tribunals often consider the substantive law chosen by the parties, the law of the contract, and other relevant legal principles.¹³⁴ According to LCIA statistics, in one year domestic laws of nineteen jurisdictions served as substantive governing law in LCIA arbitrations.¹³⁵ It is notable that English law continues to be the prevailing selection not only for LCIA arbitration,¹³⁶ but across all ICC cases.¹³⁷

SCC (Stockholm Chamber of Commerce) saw a prevalence of decisions rendered in Swedish, English, and Russian languages, with Swedish law emerging as the most commonly applied

¹³⁰ See more about his principle: Greg Fullelove, 'Functus Officio' in Julio Cesar Betancourt (ed), *Defining Issues in International Arbitration: Celebrating 100 Years of the Chartered Institute of Arbitrators*, ch. 24 (OUP 2016).

¹³⁷ Choice-of-law clauses were included in substantive contractual provisions in 95% of all cases registered in 2020. These covered the laws of 127 different nations, states, provinces and territories – the highest number to date. In 2020, the most frequently selected governing law for contracts was English law with 122 cases (13% of all cases registered), the laws of a US state (104 cases),¹⁷ followed by Swiss law (66 cases), French law (56 cases), and the laws of Brazil (42 cases). ICC, 'ICC Dispute Resolution 2020 Statistics' (ICC, 2021) <<https://nyiac.org/wp-content/uploads/2021/09/ICC-Dispute-Resolution-2020-Statistics.pdf>> accessed 12 January 2024.

DRAFT CHAPTER

governing law.¹³⁸ SIAC's caseload reflects disputes governed by the laws of a significant number of jurisdictions, with Singaporean law taking the lead at over half of cases. English Law and Indian Law feature prominently in governing law preferences in SIAC cases.¹³⁹

The applicable law in international arbitration can include domestic and international law. In some cases, especially in international commercial arbitration, the tribunal may apply *lex mercatoria* (autonomous customary rules and procedures developed within business communities).¹⁴⁰ In other cases, the parties may agree to resolve their dispute based on the principles of fairness (*amiable compositeur* or *ex aequo et bono*).¹⁴¹

A separate set of laws can apply to the arbitration agreement itself, either because the parties choose to do so or as a result of application of conflict of law rules.¹⁴²

The law of the seat of arbitration (*lex arbitri*) determines procedural matters, such as arbitrability, the enforceability of the arbitration agreement, the conduct of proceedings, and the grounds for challenging or setting aside awards.¹⁴³

Because enforcement of arbitral awards often involves jurisdictions outside of the seat of arbitration, a separate law governs the enforcement of the arbitral award. In inter-state arbitration, the significance of the seat may vary compared to other arbitration mechanisms because domestic courts usually have no authority to annul or set aside awards. It is usually possible to agree on holding hearings at a location separate from the arbitration's seat, without changing the seat or the place from which the award is issued.

Limitations on Chosen Law and Precedent's Influence on Arbitral Tribunals

While precedent usually does not bind arbitral tribunals in the same way as courts, previous arbitral tribunals' decisions, especially those addressing similar legal issues, may influence and be considered by arbitral tribunals.¹⁴⁴ This is particularly true in areas with a wealth of public awards, such as investor-state arbitration or inter-state arbitration and less so in areas where confidentiality prevails (e.g., international commercial arbitration). In other words, tribunals tend to take into account earlier cases and be consistent on various issues pertaining to

Bangladesh*, ICSID Case No. ARB/05/7, Decision on Jurisdiction (21 March 2007) (the tribunal asserted that previous decisions did not bind it but must pay due consideration to earlier decisions of international tribunals, unless it has "compelling contrary grounds" not to do so); *Caratube International Oil Company LLP v. Kazakhstan*, ICSID Case No. ARB/08/12, Decision on Provisional Measures (31 July 2009) (the arbitral tribunal relied on legal rules to confer legal effects on previous decisions, considering them as supplementary means of interpretation, although stating that previous decisions do not bind arbitrators).

DRAFT CHAPTER

jurisdiction and procedure, such as the timeliness of raising objections to jurisdiction and the authority of the tribunal to prescribe interim measures.¹⁴⁵

Even when the parties have chosen a specific law to govern their contract, tribunals may refuse to apply provisions that violate public policy or mandatory rules of the enforcement jurisdiction.¹⁴⁶

The law governing the arbitration agreement, the choice of law by the parties, the law of the seat, the law applicable to the arbitration agreement and the law of the enforcement jurisdiction collectively shape the legal framework within which the arbitral tribunal operates. Tribunals aim to strike a balance between respecting party autonomy and applying principles that ensure a fair and just resolution of the dispute.

8. Awards and enforcement

Types of Awards

An award in the context of arbitration refers to the final binding decision issued by an arbitral tribunal. An award can cover various issues,¹⁴⁷ including jurisdiction, merits, and quantum (determining the amount of compensation). These may further be classified as provisional, interim or final. Additionally, awards may involve either monetary compensation or non-monetary redress (e.g. returning goods in kind). If the parties manage to resolve their dispute amicably and reach a settlement, they may opt to formalize the terms of their agreement in a consent award for enforcement benefits.¹⁴⁸

While all awards in arbitration are generally considered binding and 'final,' i.e. resolving the specific issues in dispute, parties typically reserve the term 'final award' for decisions that conclude the tribunal's mission.¹⁴⁹ Upon the delivery of a final award, the tribunal loses jurisdiction over the dispute, terminating its special relationship with the parties. However, even after it has issued its final award, the tribunal still has some 'residual' jurisdiction (e.g., to correct an award). Tribunals may issue a separate award explicitly labelled as a partial award. The power to issue partial awards may lead to potential time and cost savings for all parties

¹⁴⁵ Gabrielle Kaufmann-Kohler, 'Arbitral Precedent: Dream, Necessity or Excuse? The 2006 Freshfields Lecture' (2007) 23 *Arbitration International* LCIA 361; Mayer (n 140) suggests that, in commercial arbitrations, tribunals are less inclined to attribute precedential importance to other awards, whereas sport arbitrations exhibit a significant dependence on precedents; investment arbitration involves the gradual establishment of rules by examining past cases.

¹⁴⁶ See, e.g., *Marketing Displays International Inc. v VR Van Raalte Reclame BV*, Case Nos 04/694 and 04/695, 24 March 2005 (Dutch Court of Appeal affirmed a lower court's denial of exequatur for three US arbitral awards. The authority denied the awards, considering them incompatible with Article 81 of the Treaty establishing the European Community of 2002, thereby contravening public policy); also see more generally Jan Kleinheisterkamp, "Overriding Mandatory Laws in International Arbitration." *International & Comparative Law Quarterly* 67.4 (2018): 903-930.

¹⁴⁷ Examples of provisions on types of award include ICC Rules (n 77), Art. 2v; UNCITRAL Rules (n **Error! Bookmark not defined.**), Art. 34(1); SIAC Rules (n 76), Art. 32(5).

¹⁴⁸ UNCITRAL Model Law 1985 (n 11), Art. 30; ICC Rules (n 77), Art. 33; see also Yarik Kryvoi, and Dmitry Davydenko. "Consent Awards in International Arbitration: from Settlement to Enforcement." *Brooklyn Journal of International Law*, Vol. 40, P. 827 (2014).

DRAFT CHAPTER

involved. Issuing a partial award may make a particular sense where it is possible to separate issues, for example, those related to jurisdiction, merits and quantum.¹⁵⁰

Parties can request additional awards to address unresolved issues by the initial tribunal decision. Many arbitration rules allow for such requests, and even without explicit provisions for obtaining additional awards.¹⁵¹ It is also possible to see interpretation of particular issues or specific issues from the tribunal.¹⁵²

Requirements as to the Form of Award

Parties primarily determine the form of the award through the arbitration agreement and the applicable law. The arbitration agreement, including chosen institutional rules, may specify formalities. For instance, the UNCITRAL Rules and PCA Optional Rules for inter-state arbitration mandate a written award with stated reasons, signed by the arbitrators, and including relevant details.¹⁵³ The ICSID Arbitration Rules provide a comprehensive set of requirements for writing an award, encompassing party designations, procedural details, factual summaries, and cost considerations, which emphasizes the significance of adhering to institutional rules.¹⁵⁴ As discussed in more detail below, some institutional rules, most famously perhaps the ICC, provide for scrutiny by the institution itself to ensure the award meets certain formal requirements.¹⁵⁵

Domestic law may also impose specific form requirements, often centred on the award being in writing, reasoned, dated, and signed.¹⁵⁶ Complying with these requirements is crucial for arbitral tribunals to ensure the validity and enforceability of their awards.

Internal Review Mechanisms in Arbitration

Internal review mechanisms in arbitration refer to procedures that allow parties to challenge arbitral awards within the framework of the arbitral process.¹⁵⁷ Arbitral tribunals design these mechanisms to address specific issues that may arise during or after the arbitration, providing a form of internal check on the fairness and validity of the arbitral proceedings.

¹⁵⁷ See Chapter XX of this book (Reinisch).

DRAFT CHAPTER

In institutional arbitration, the arbitral rules may provide for internal review mechanisms.¹⁵⁸ For example, the ICC Rules provide for an internal review of all draft awards by the ICC's International Court of Arbitration (the 'scrutiny' process referred to above), which may 'lay down modifications as to the form of the award' and draw a tribunal's 'attention to points of substance'.¹⁵⁹ Every ICC award must be approved by the ICC Court before it can be officially rendered. The SIAC rules provide for a similar internal review process.¹⁶⁰

The ICSID Convention provides for a mechanism for annulment of awards. Parties can request annulment on specific grounds, such as a serious departure from a fundamental rule of procedure or a manifest excess of powers.¹⁶¹ Similarly, certain institutional rules allow for appeals on points of law.¹⁶² However, such mechanisms are relatively rare in international commercial arbitration, where the finality of awards is generally praised.

Lastly, arbitration rules may provide procedures for correcting clerical or typographical errors in the award or seeking an interpretation of specific points in the award. These procedures do not aim to challenge the substance of the award but to address minor issues.¹⁶³

External Review Mechanisms in Arbitration

If a party, due to genuine concerns or strategic considerations, concludes that an issue affecting the award cannot be rectified by the arbitral tribunal and if there is no provision for internal review under the applicable rules, it may turn to domestic courts to set aside the award, either in its entirety or in part. Arbitral awards may be subject to setting aside proceedings before the seat's domestic courts.¹⁶⁴ Setting aside proceedings typically involve grounds such as procedural irregularities, lack of jurisdiction, or public policy violations.¹⁶⁵ In addition, it is possible to resist enforcement of arbitral awards, where courts in the enforcement jurisdiction may decline to recognise and enforce a foreign arbitral award.

Enforcement

The enforcement of arbitral ensures that the binding decisions made by arbitrators are not merely symbolic but have practical consequences. In the context of commercial and investor-

DRAFT CHAPTER

state arbitration the 1957 New York Convention (ratified by over 170 States) aims to ensure that the award can be recognised and effectively enforced across different jurisdictions if the losing party does not voluntarily comply with it.¹⁶⁶ The public policy exception is one of the most common grounds for refusing the enforcement of an arbitral award under the New York Convention and many national laws.¹⁶⁷ Public policy interpretations vary widely between jurisdictions, which may lead to inconsistencies in the outcomes of enforcement proceedings.¹⁶⁸

The ICSID Convention requires its members States (ratified by nearly 160 States¹⁶⁹) requires as though it were a final judgment of a court in that State.¹⁷⁰ Moreover, regional conventions establish a different enforcement regime. A leading example is the Inter-American Convention on International Commercial Arbitration, also referred to as Panama Convention, concluded in 1975 among the United States and most Latin American nations.¹⁷¹

9. Relationship between Arbitration Tribunals and Domestic/International Courts

While parties often opt for arbitration to avoid court litigation, in some instances it is necessary to involve courts. These include determining jurisdiction, appointment and challenges of arbitrators, provisional measures, setting aside awards, appeals on points of law and recognition and enforcement of awards.

It must be noted that the role of domestic courts is more limited in case of inter-state disputes governed by public international law. States are regarded as equal in the eyes of international law and courts of one State cannot have jurisdiction over another State.¹⁷² Some exceptions may include situations when States consent to participate in domestic proceedings and waive their sovereign immunity [Anna, do you agree with the last sentence?].

As discussed earlier, arbitral tribunals have the primary authority to rule on their own jurisdiction, by virtue of the *Kompetenz-Kompetenz* principle. However, parties may bring issues related to jurisdiction before domestic courts, particularly when a party challenges the tribunal's authority or when there are disputes over the existence or validity of the arbitration agreement.¹⁷³

Parties usually determine the process of appointing and challenging arbitrators through the arbitration agreement, concluded within the framework of relevant institutional rules and the

law of the seat. In some cases, if parties are unable to agree on the appointment of an arbitrator, domestic courts may have a role in appointing an arbitrator.¹⁷⁴ As discussed above, arbitral tribunals have the authority to grant interim relief with support of domestic courts, especially when urgency is a factor.¹⁷⁵ Courts can issue injunctions or other measures to preserve assets or maintain the status quo pending the arbitration.¹⁷⁶

Lastly, as mentioned previously, domestic courts play a critical role in enforcing awards within their jurisdictions.

10. Future outlook

As the landscape of international arbitration evolves, practitioners, institutions, policymakers, and other stakeholders continue to explore how to enhance the efficiency and legitimacy of arbitration. Efficiency and legitimacy are critical to the success of international arbitration. Efforts to streamline procedures, enhance transparency, and ensure diversity among arbitrators contribute to the perceived efficiency and legitimacy of the process.¹⁷⁷ Striking the right balance between expeditious resolution and ensuring due process remains a challenge.

Arbitral tribunals are increasingly prioritizing diversity and inclusion.¹⁷⁸ Efforts to enhance gender and regional representation are gaining momentum, with institutions and practitioners acknowledging the value of diverse perspectives in decision-making.¹⁷⁹ This focus on diversity extends beyond gender and region, encompassing a broader range of backgrounds and expertise.

The adoption of digital tools and technology in arbitration is likely to further affect the development of arbitration.¹⁸⁰ Online case management, virtual hearings, and the use of artificial intelligence for document review are among the trends that could enhance efficiency and reduce costs.¹⁸¹

DRAFT CHAPTER

Furthermore, there is a growing emphasis on integrating environmental, social, and governance considerations into arbitration. Parties and arbitrators are increasingly mindful of the broader societal, environmental and governance impacts of disputes.¹⁸² With the increasing focus on climate change and sustainability, the field of international arbitration may see a rise in disputes related to environmental issues and sustainable development. This trend emphasizes the need for arbitrators to possess expertise in diverse areas, including environmental law and sustainable business practices.¹⁸³

The use of third-party funding¹⁸⁴ in arbitration is a topic of ongoing discussion. Regulatory developments and ethical considerations surrounding third-party funding may shape its future role in international arbitration.¹⁸⁵ Striking a balance between promoting access to justice and addressing potential conflicts of interest remains a focal point of this discourse.

Recent global events, such as the COVID-19 pandemic, have highlighted the importance of flexibility and adaptability in dispute resolution mechanisms.¹⁸⁶ The ability of arbitration to respond to unforeseen challenges and crises will likely be a focus for future developments.

The international arbitration community continually explores ways to enhance the efficiency and fairness of the process. Proposals for reform include revising institutional rules, addressing issues related to costs and duration of proceedings, and adapting to evolving legal and business landscapes.¹⁸⁷ Collaborative efforts across jurisdictions and sectors, in some cases coordinated by international organisations such as UNCITRAL and ICSID, will be pivotal in ensuring that international arbitration remains a desirable and legitimate method of dispute resolution.

¹⁸³ The PCA offers specialized rules for arbitration and conciliation of environmental disputes: PCA – Optional Rules for Arbitration of Disputes relating to Natural Resources and/or the Environment.

¹⁸⁴ Third-party funding in arbitration involves a financial agreement where a third party, often a financial institution or individual, provides capital to support a party's participation in arbitration. The funding covers arbitration expenses like legal fees and expert charges. In return, the funder receives a share of the final arbitral award if the funded party prevails. This arrangement is typically non-recourse, relieving the funded party of repayment if the claim is unsuccessful.

¹⁸⁶ The International Chamber of Commerce (ICC) and other arbitration institutions have adopted electronic-only submissions, which have proven to be efficient and environmentally friendly: ICC Commission 2022 (n 181).

¹⁸⁷ Various institutions have made it significantly easier to conduct multi-party arbitrations and have expanded the scope of expedited and reduced-cost arbitral proceedings, thereby addressing cost and time-saving measures i.e., the updated ICC Rules of January 2021, have broadened the application of expedited arbitration by raising the threshold for opting out from 2 million to 3 million US dollars. Furthermore, the ICSID Rules allow parties to voluntarily choose expedited arbitration, The LCIA Rules of October 2020, explicitly acknowledge tribunals' power to promptly dismiss claims lacking merit, with the aim of shortening the time it takes for tribunals to deliver their awards by setting an eight-month deadline from the conclusion of arguments.
