

ADAM Objects

Information leaflet

10 September 2020

Note: The object titles are linked to the corresponding entry in the ADAM help (only in German).

Objects: Organisation	
Folder	store and provide materials and structure them by time or topic
Session	create event dates, assign materials and receive registrations
Group	workspace in a workspace: set up group rooms for group work and provide materials there
Group Link	create a link to a group located somewhere in ADAM (only members of the group have access)
Item Group	arrange modules and teaching/learning materials, e.g. in terms of content or time, to structure the workspace
Objects: Communication	
Forum	discuss asynchronously or communicate announcements to all workspace members quickly and easily
Objects: Content	
File	upload files individually or as a package
Weblink	provide internal and external links individually or as a link collection
Wiki	develop and structure content in collaboration with others and link it within the Wiki or to external online sources
Blog	engage with (specialist) topics, comment on contributions from others and keep learning diaries
Learning Module	structure and provide multimedia content within learning modules
Glossary	make central terms available and link terms from learning modules and wikis to the glossary

Data Collection	collect, structure, filter, comment and export content in a database
Objects: Assessment	
Exercise	prepare, distribute, collect and evaluate tasks and exercises during the semester
Test	prepare and conduct tests during the semester to check the level of knowledge and to prepare for an exam
Question Pool Test	create, collect and manage questions for tests
Objects: Feedback and Evaluation	
Poll	ask closed questions to your students in order to obtain opinions or assess their level of knowledge
Survey	use anonymous and non-anonymous surveys to receive feedback and carry out evaluations and inquiries (not in public workspaces)
Question Pool Survey	create, collect and manage questions for surveys
Objects: Templates	
Portfolio Template	create and provide pre-structured portfolio templates
Objects: other	
DigiLit	have the digital semester catalogue created in ADAM via the university library
Etherpad	create, edit and discuss texts together synchronously or asynchronously
Plagiarism Detection	check student assignments for plagiarism (Turnitin)
LiveVoting	activate students in courses: inquire their level of knowledge or obtain feedback and opinions
Panopto Video	record, edit or upload videos outside ADAM and make them available to students via ADAM
Portfolio	reflect on the learning process in the portfolio, document selected work results or create a competence profile
